Based on this Circular members may receive another notice from concerned SE's demanding to provide details CGP verification details.

As advised earlier, members who have their own captive power plants can submit the details to the Concerned SE's.

For the others we advise our members that as a precautionary measure they should reconcile the details with the Power Generators who are supplying power and confirm that they have complied with the CGP norms.

In this regard our Director has created a working Tool which is enclosed for your reference. We request the members to make use of the working sheets (whichever is applicable to their case) and prudently make a reconciliation with the generators and ensure that the figures furnished in Balance sheet are matching. The onus of doing this lies with the individual members.

Once the Reconciliation process is completed, TECA will guide on submission of documents.

With Warm Regards,

K. Ilango
