Dear All,

Sub: Webinar on "Tamil Nadu Solar QCA Real Time Data Webinar".

You are aware that as per the TNERC RE DSM Regulations 2024, it is mandatory to share your solar plant real-time generation data every 15-minute time block basis to ensure lower DSM charges and the most accurate forecasts. If you have a SCADA system installed at your solar plant, you will need to integrate the same with our internal servers via FTP.

If SCADA is unavailable, we recommend installing our in-house GRID Box modem and ABT meter and connecting them to the plant's HT side to transmit real-time generation data to our servers for further utilization.

Once the real-time data flow is established, we will provide you with the login credentials for our GRID Connect portal. These credentials can be used to monitor forecast accuracies, asset status, and DSM impact analysis effectively.

In this connection, RE-Connect is conducting a webinar today at 4 p.m. to explain this matter in detail. Please attend the same through the following link

Tamil Nadu Solar QCA Real Time Data Webinar

Wednesday, October 9 · 4:00 – 5:00pm

Time zone: Asia/Kolkata
