May 22, 2023

To All Members

CIRCULAR

Dear Members,

Sub: Adjustment of higher slot generated energy against the consumption at lower slots-CFC-Revenue instructs to extend the benefits in terms of the Tariff Order No. 7 of 2022 dated 09.09.2022 to other categories of consumers Also-Regarding.

Ref: The Letter of CFC-Revenue in CFC/Rev/FC/Rev/AO/D.No.332/2023 dated 18.05.2023.

Please find the soft copy of the letter sent by CFC-Revenue to concern Officials instructing adjustment of higher slot generation against lower slot consumption except above cited, addressed to all Superintending Engineers, is sent herewith for the information of all members.

Accordingly, the CFC-Revenue has advised to extend the facility of adjustment of the higher slot generation against the consumption at the lower slots also, as usual in addition to HT-IA Industries.

Due to the modification of peak hours, from 6.00 AM – 9.00 AM and 6.00 PM and 9.00 PM to 6.00 AM-10.00 AM and 6.00 PM and 10.00 PM, any energy generated during the modified peak hours is eligible for adjustment against the lower slots also i.e., from peak hour to normal hour / off peak hour and from normal hour to off peak hour. This procedure is already in practice and however, the CFC-Revenue has reiterated to implement the same once again.

This facility is not however applicable to other categories of HT supplies, such as HT Lift Irrigation, HT V (EV PCS) and Temporary Supply. The practice of allowing adjustment of higher slot generated units for consumption at lower slots, is not applicable in respect of other powers like IEX sourced power, where the adjustment has to go by bided slot to bided slot. This facility of adjustment higher slot to lower slot is ordered by the TNERC, only in the respective Tariff Orders provided for Wind / Solar Energy and therefore, this facility cannot be extended to other sources of power.

With Warm Regards

N. Pradeep
President
